TABLE HAWK™

Table Hawk

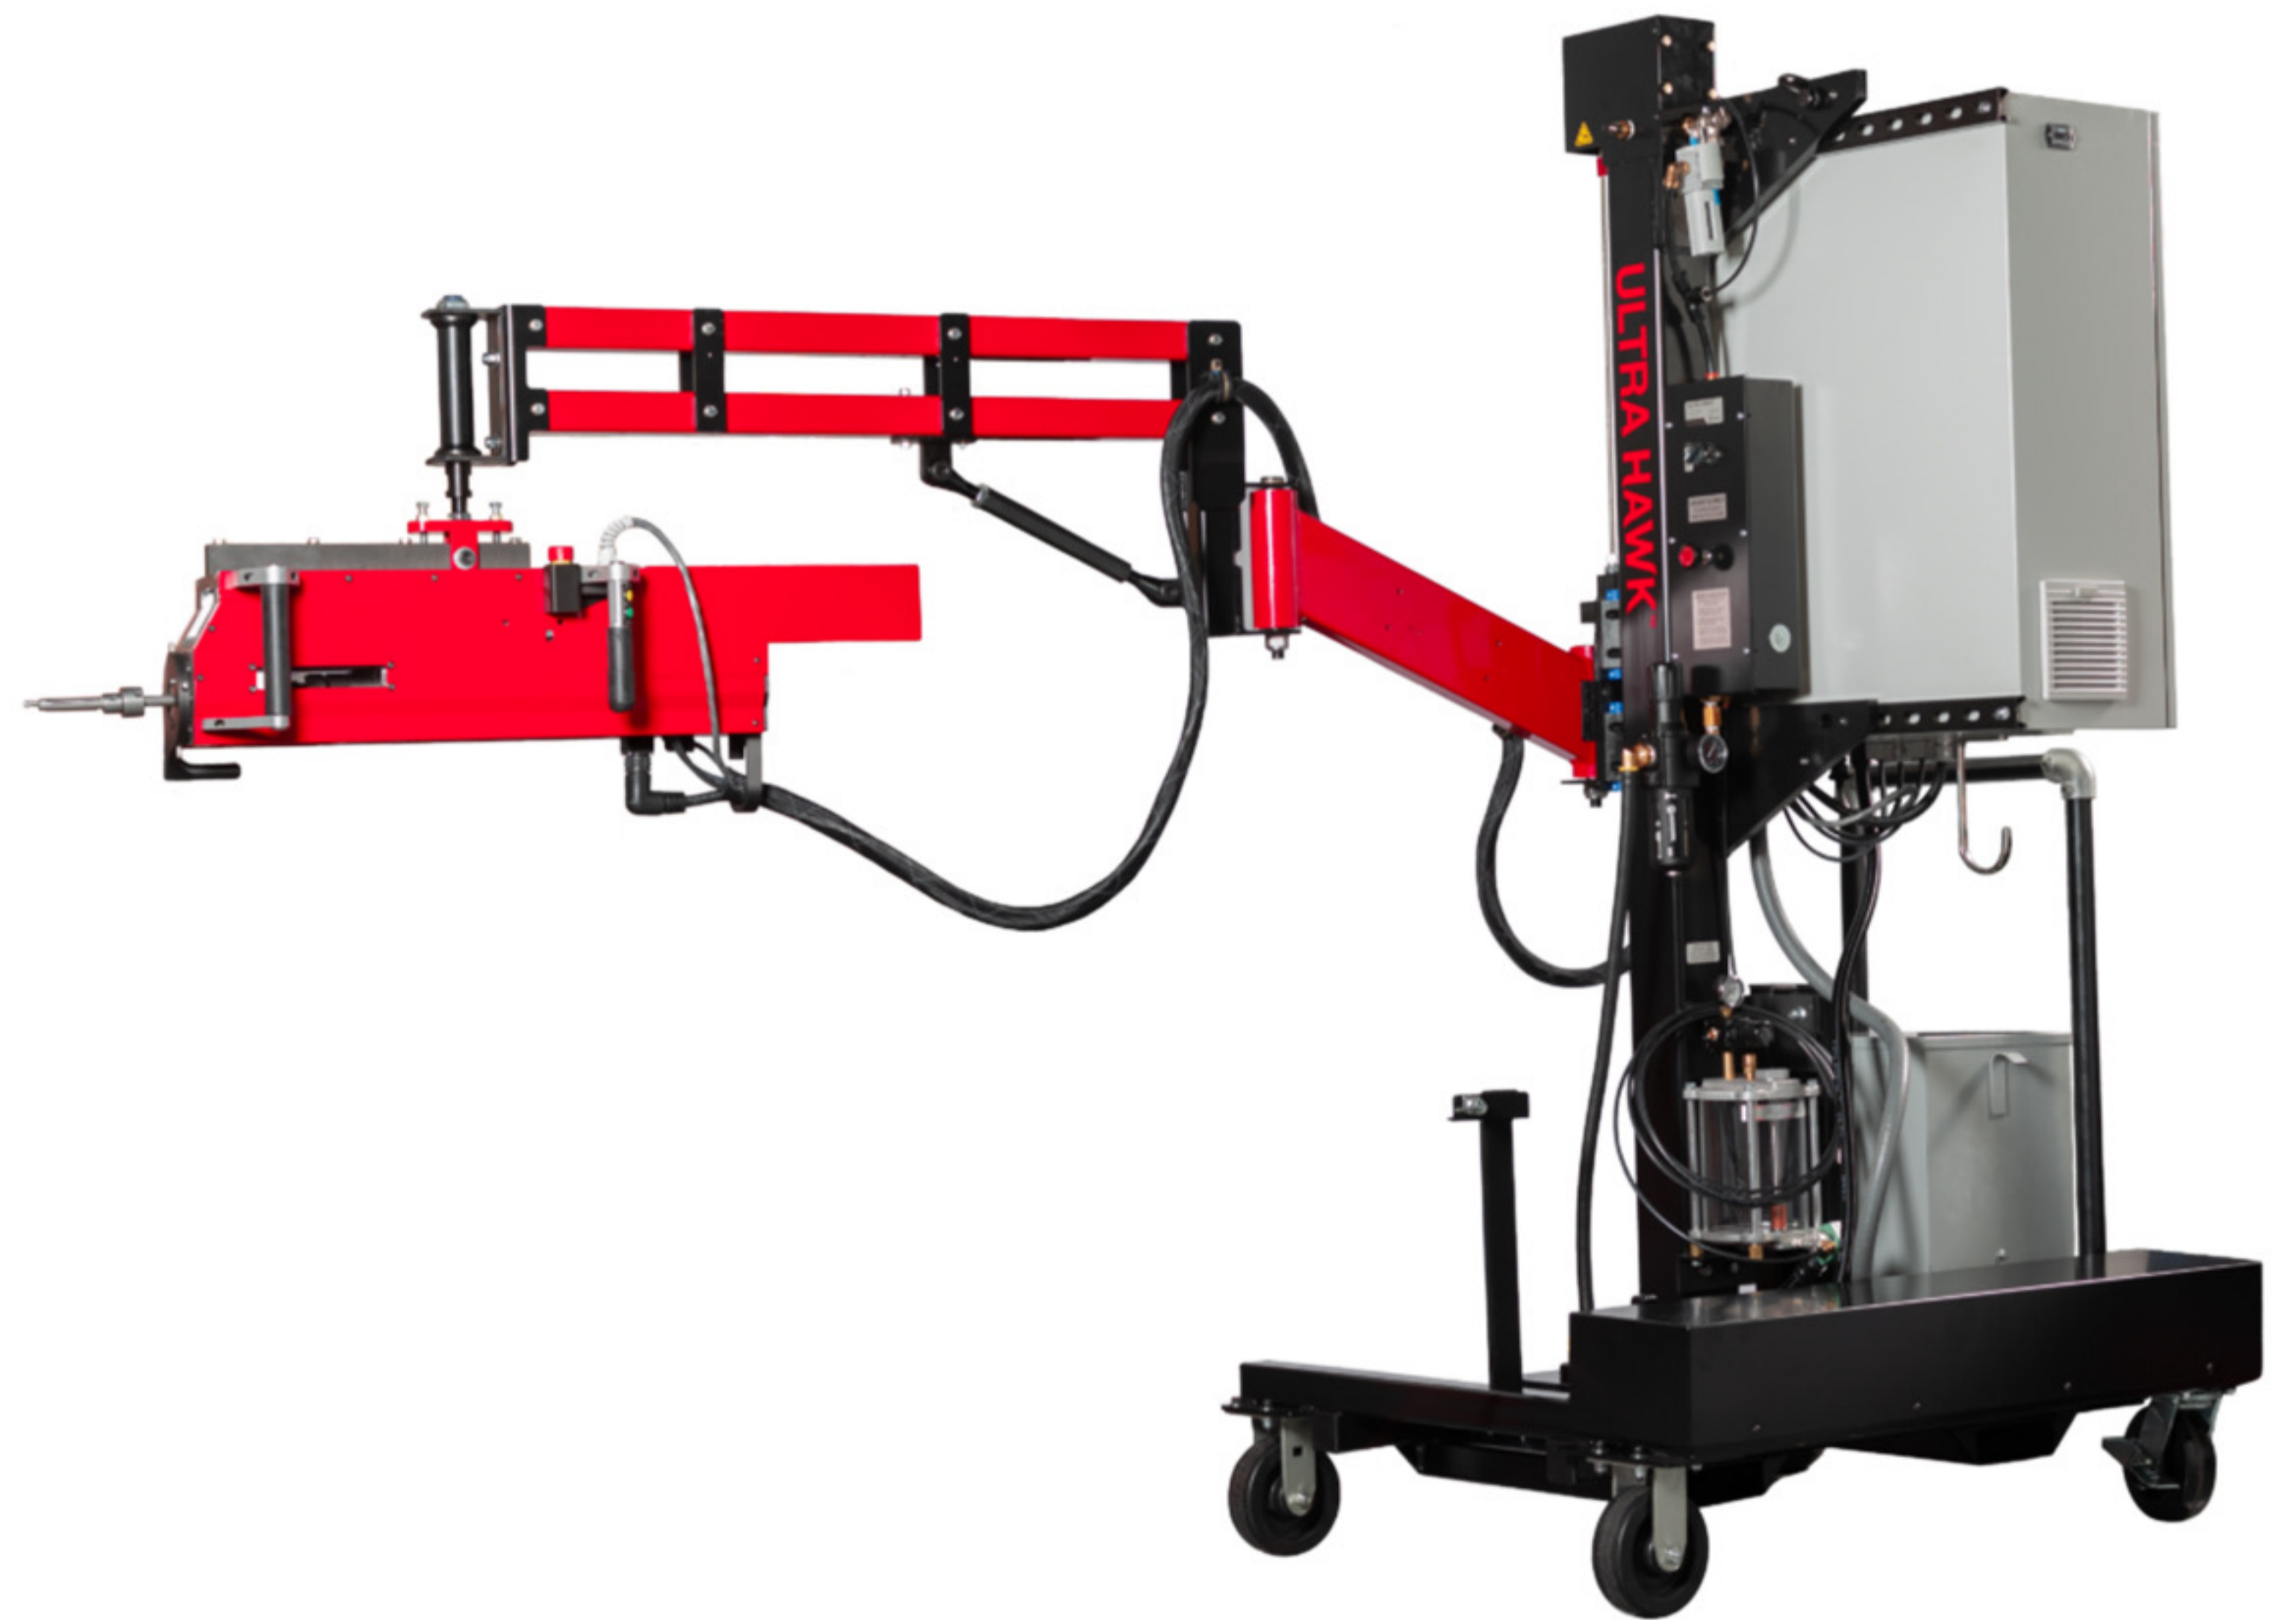

Engineered to productively and precisely expand small tubes commonly found in oil coolers and other small heat exchangers.

RAPID HAWK™

Rapid Hawk

Offering the speed and productivity of a pneumatic motor with the precision and control of an electronically controlled system.

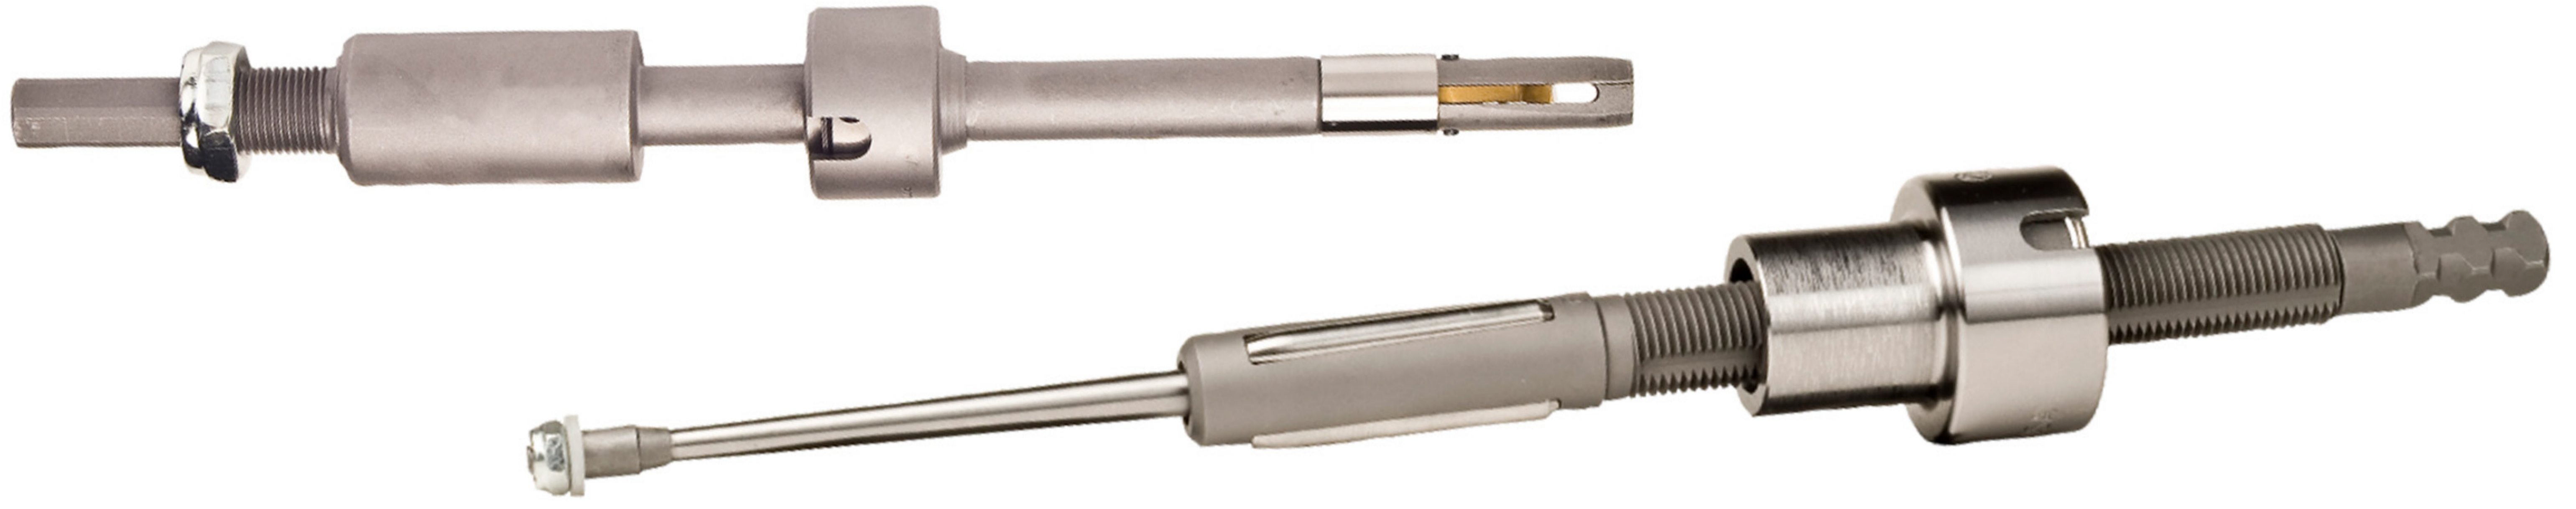

ULTRA HAWK™

Ultra Hawk

Offering the speed and productivity of an electric servo motor and the capability to perform parallel pin and traditional expansion at the flip of a switch.

Quality Tube Tools for an "I Need It Yesterday" World™

24 Series Heat Exchanger Expander

Significantly reduce your industry tooling costs with the leading heat exchanger expander. Available in 4", 8", and 12" reaches.

Rolling Motors

Elliott's electric and pneumatic rolling motors are fast and robust for increased productivity job after job.

ELC110220 Electric Torque Controller

Set-up is easy and two to three times faster, even for inexperienced operators.

Tube Testers

Elliott knows that ensuring heat exchanger quality is an important part of your job. For this reason, Elliott's Test Guns allow you to quickly find tube leaks.

RECON Series Vacuum and Pressure Test Guns

Durable cast aluminum body and steel gauge body protect the working component.

Tube Removal

Heat exchanger tubes will eventually wear to the point that plugging must be stopped in favor of retubing. Elliott offers every tool you will need to remove these types of tubes.

PTTC Series Tube Cutter

Quick set-up to cut tubes just beyond

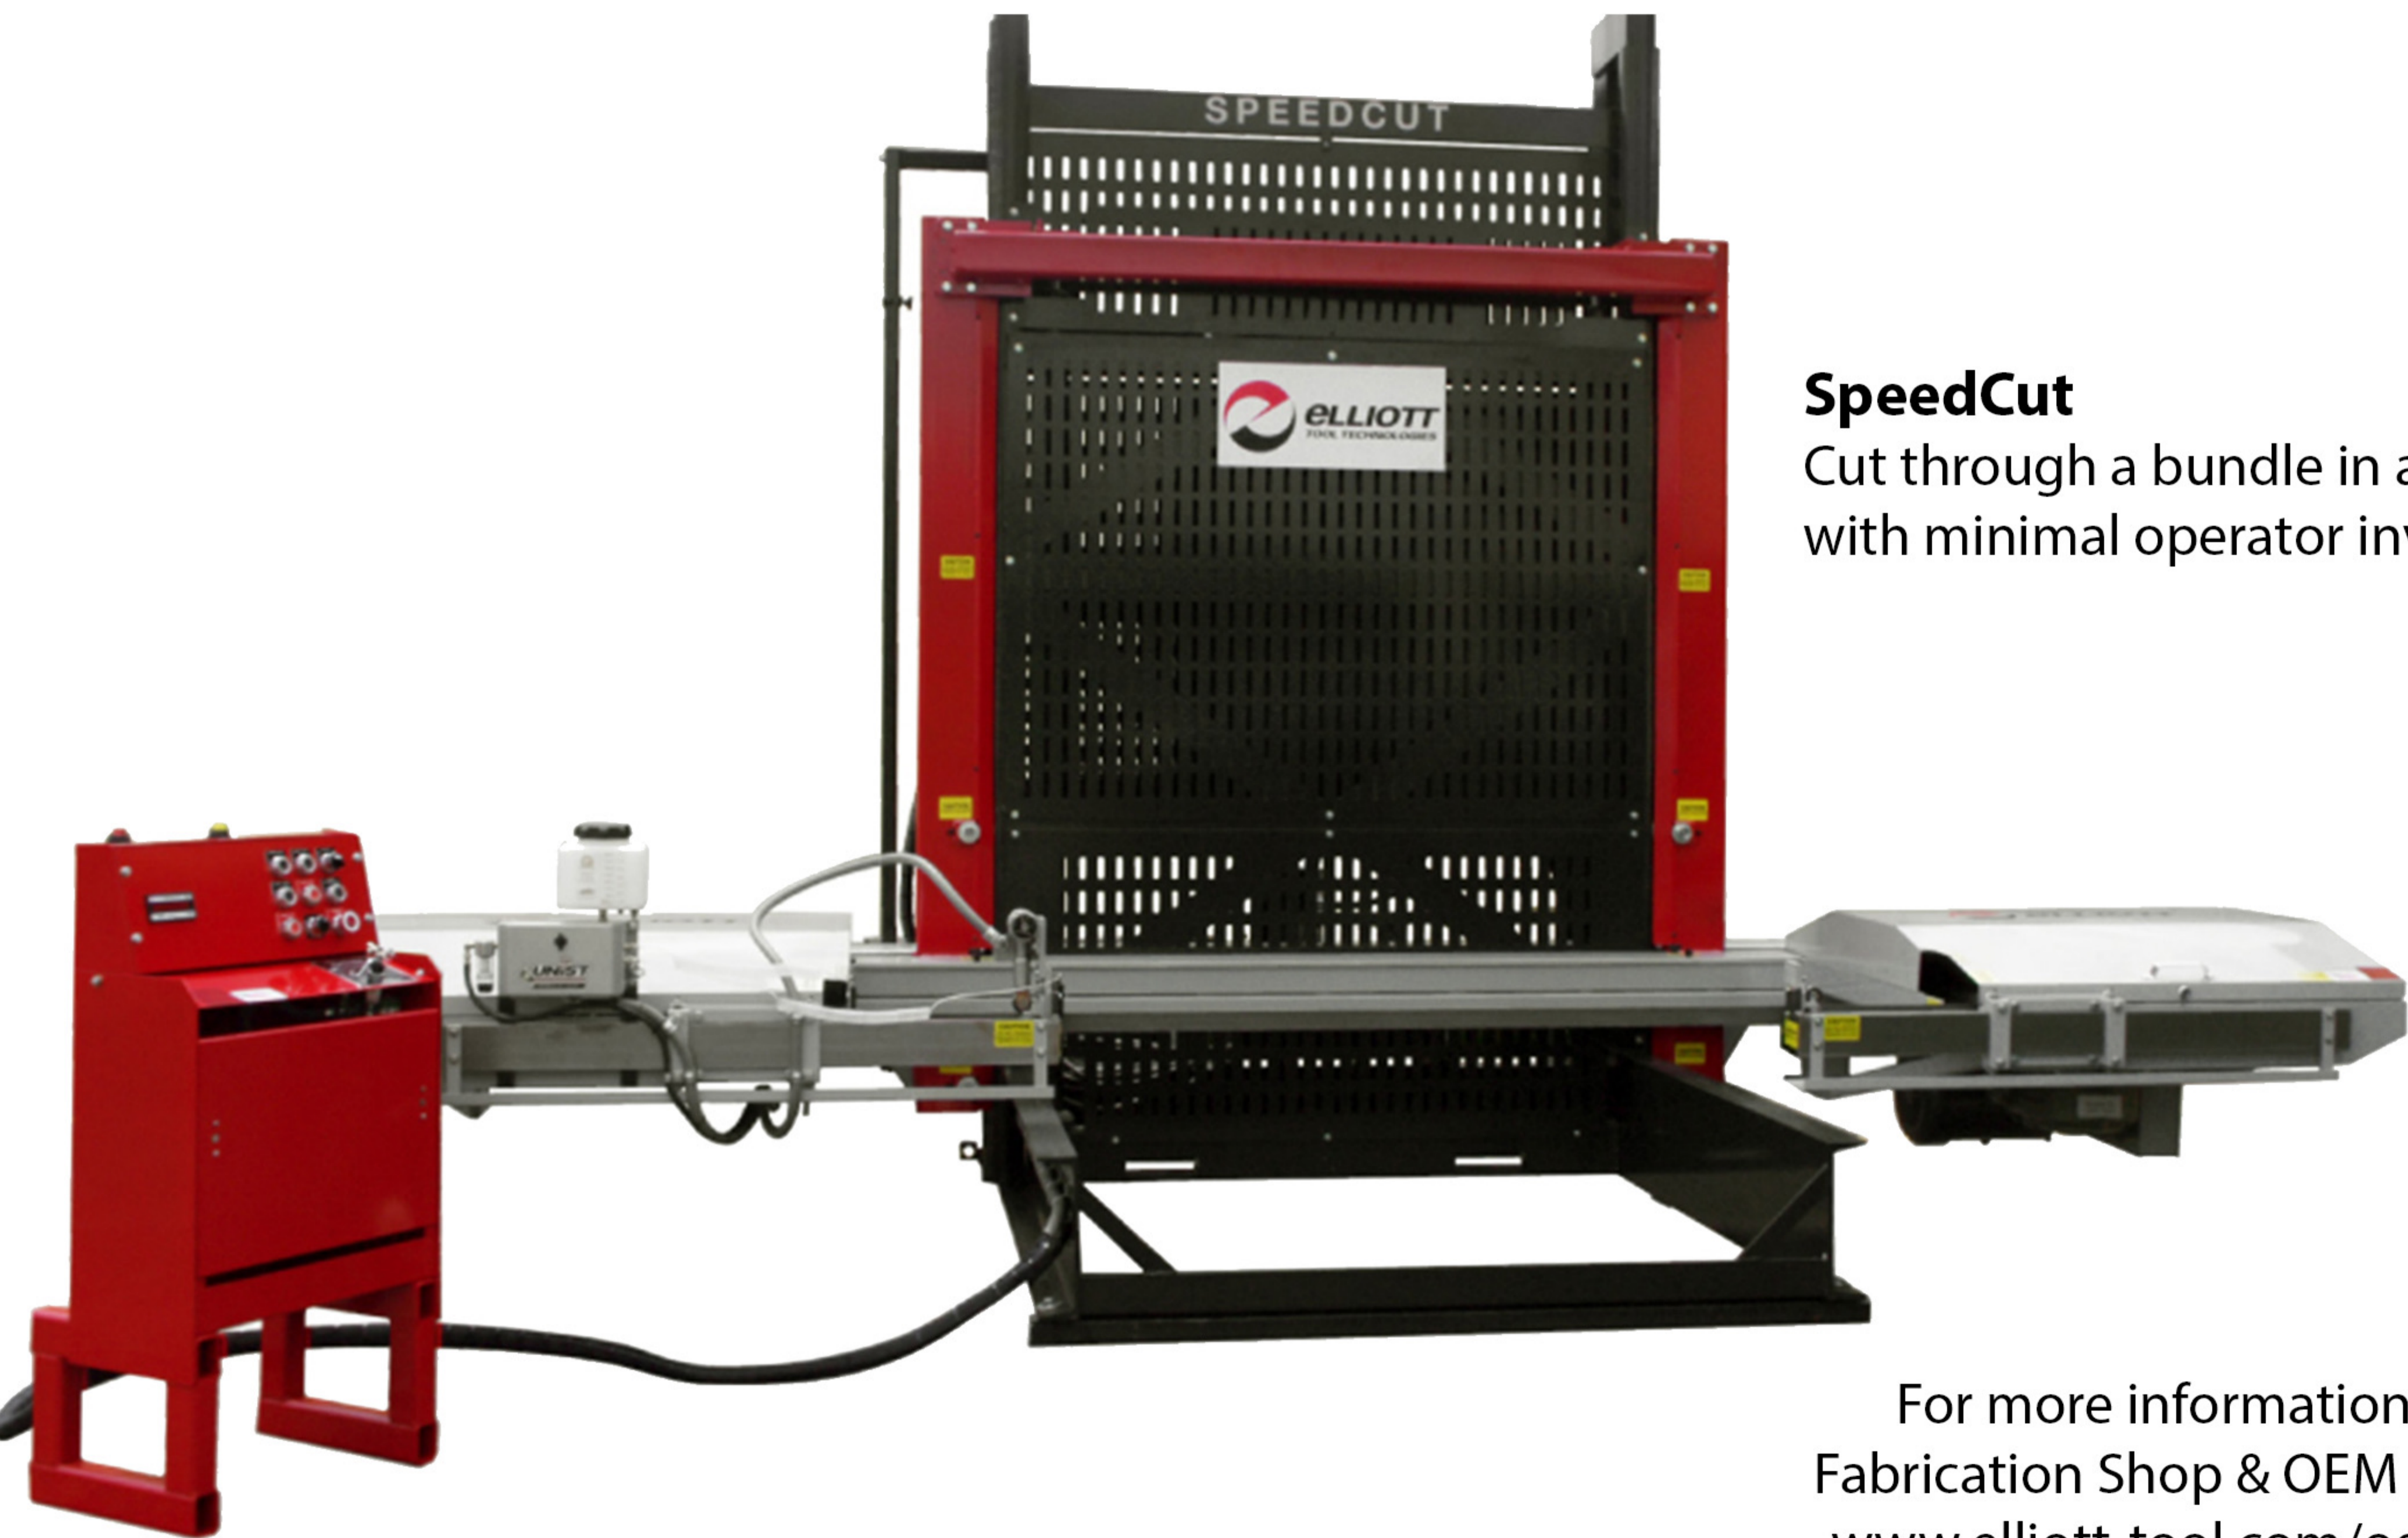

Spears

Reduce tooling costs with an innovative design that withstands significantly more force than other spears.

Tube Tugger

30-ton pulling capacity for tough applications.

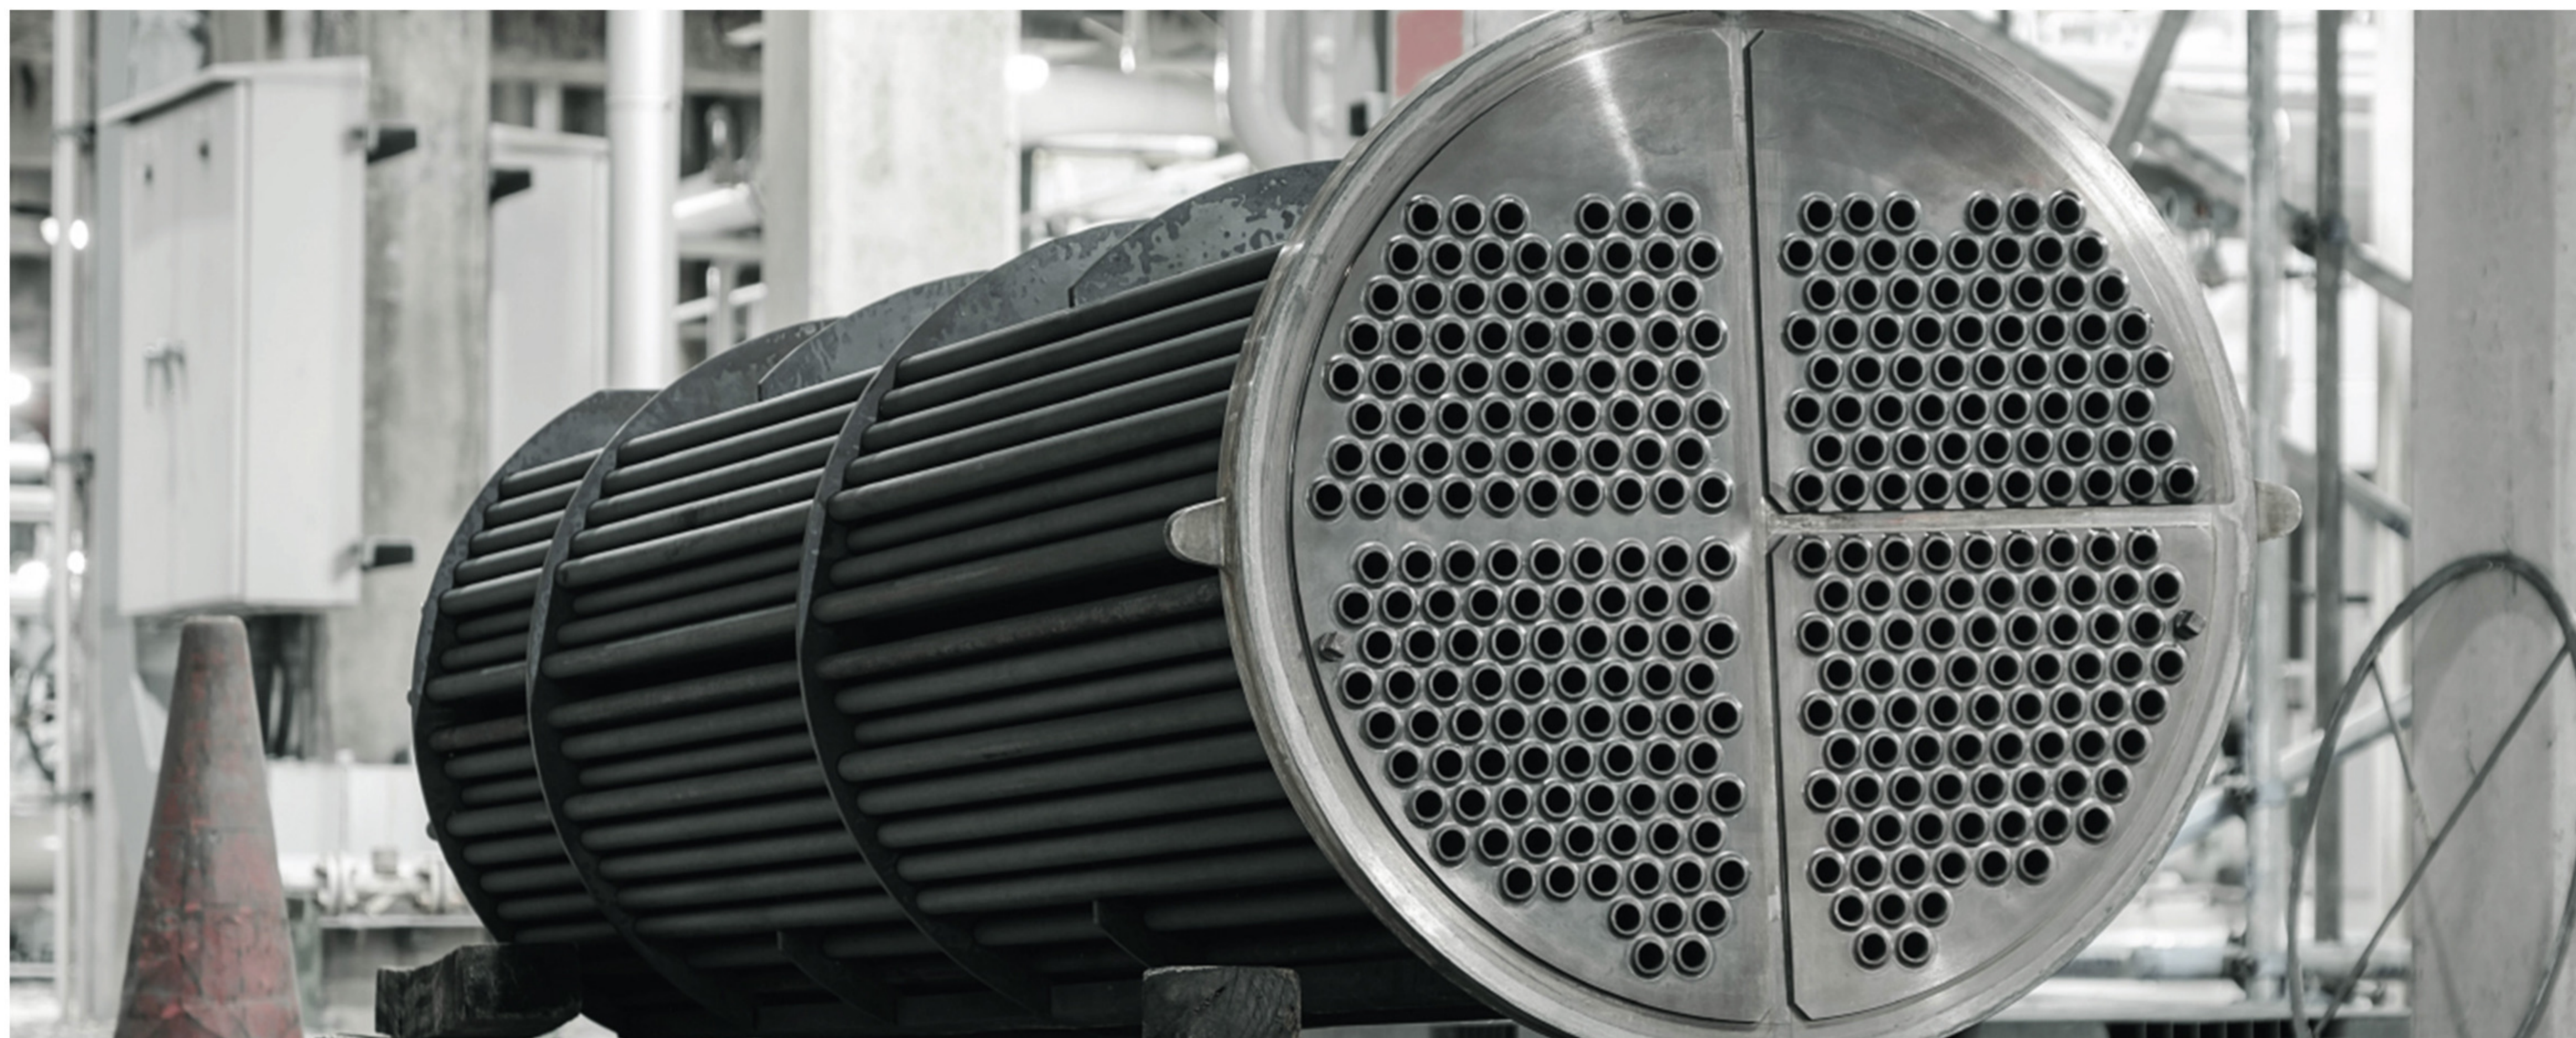

SpeedCut

Cut through a bundle in about an hour with minimal operator involvement.

For more information about our Fabrication Shop & OEM Products visit: www.elliott-tool.com/oem-fab-shops

Fab shops and OEM employees are master jugglers meeting customer needs, shifting schedules, and working around the clock to get the job done. With many pressures to get the job done quickly and cost effectively, the last thing employees should have to worry about is the quality or availability of heat exchanger tools.

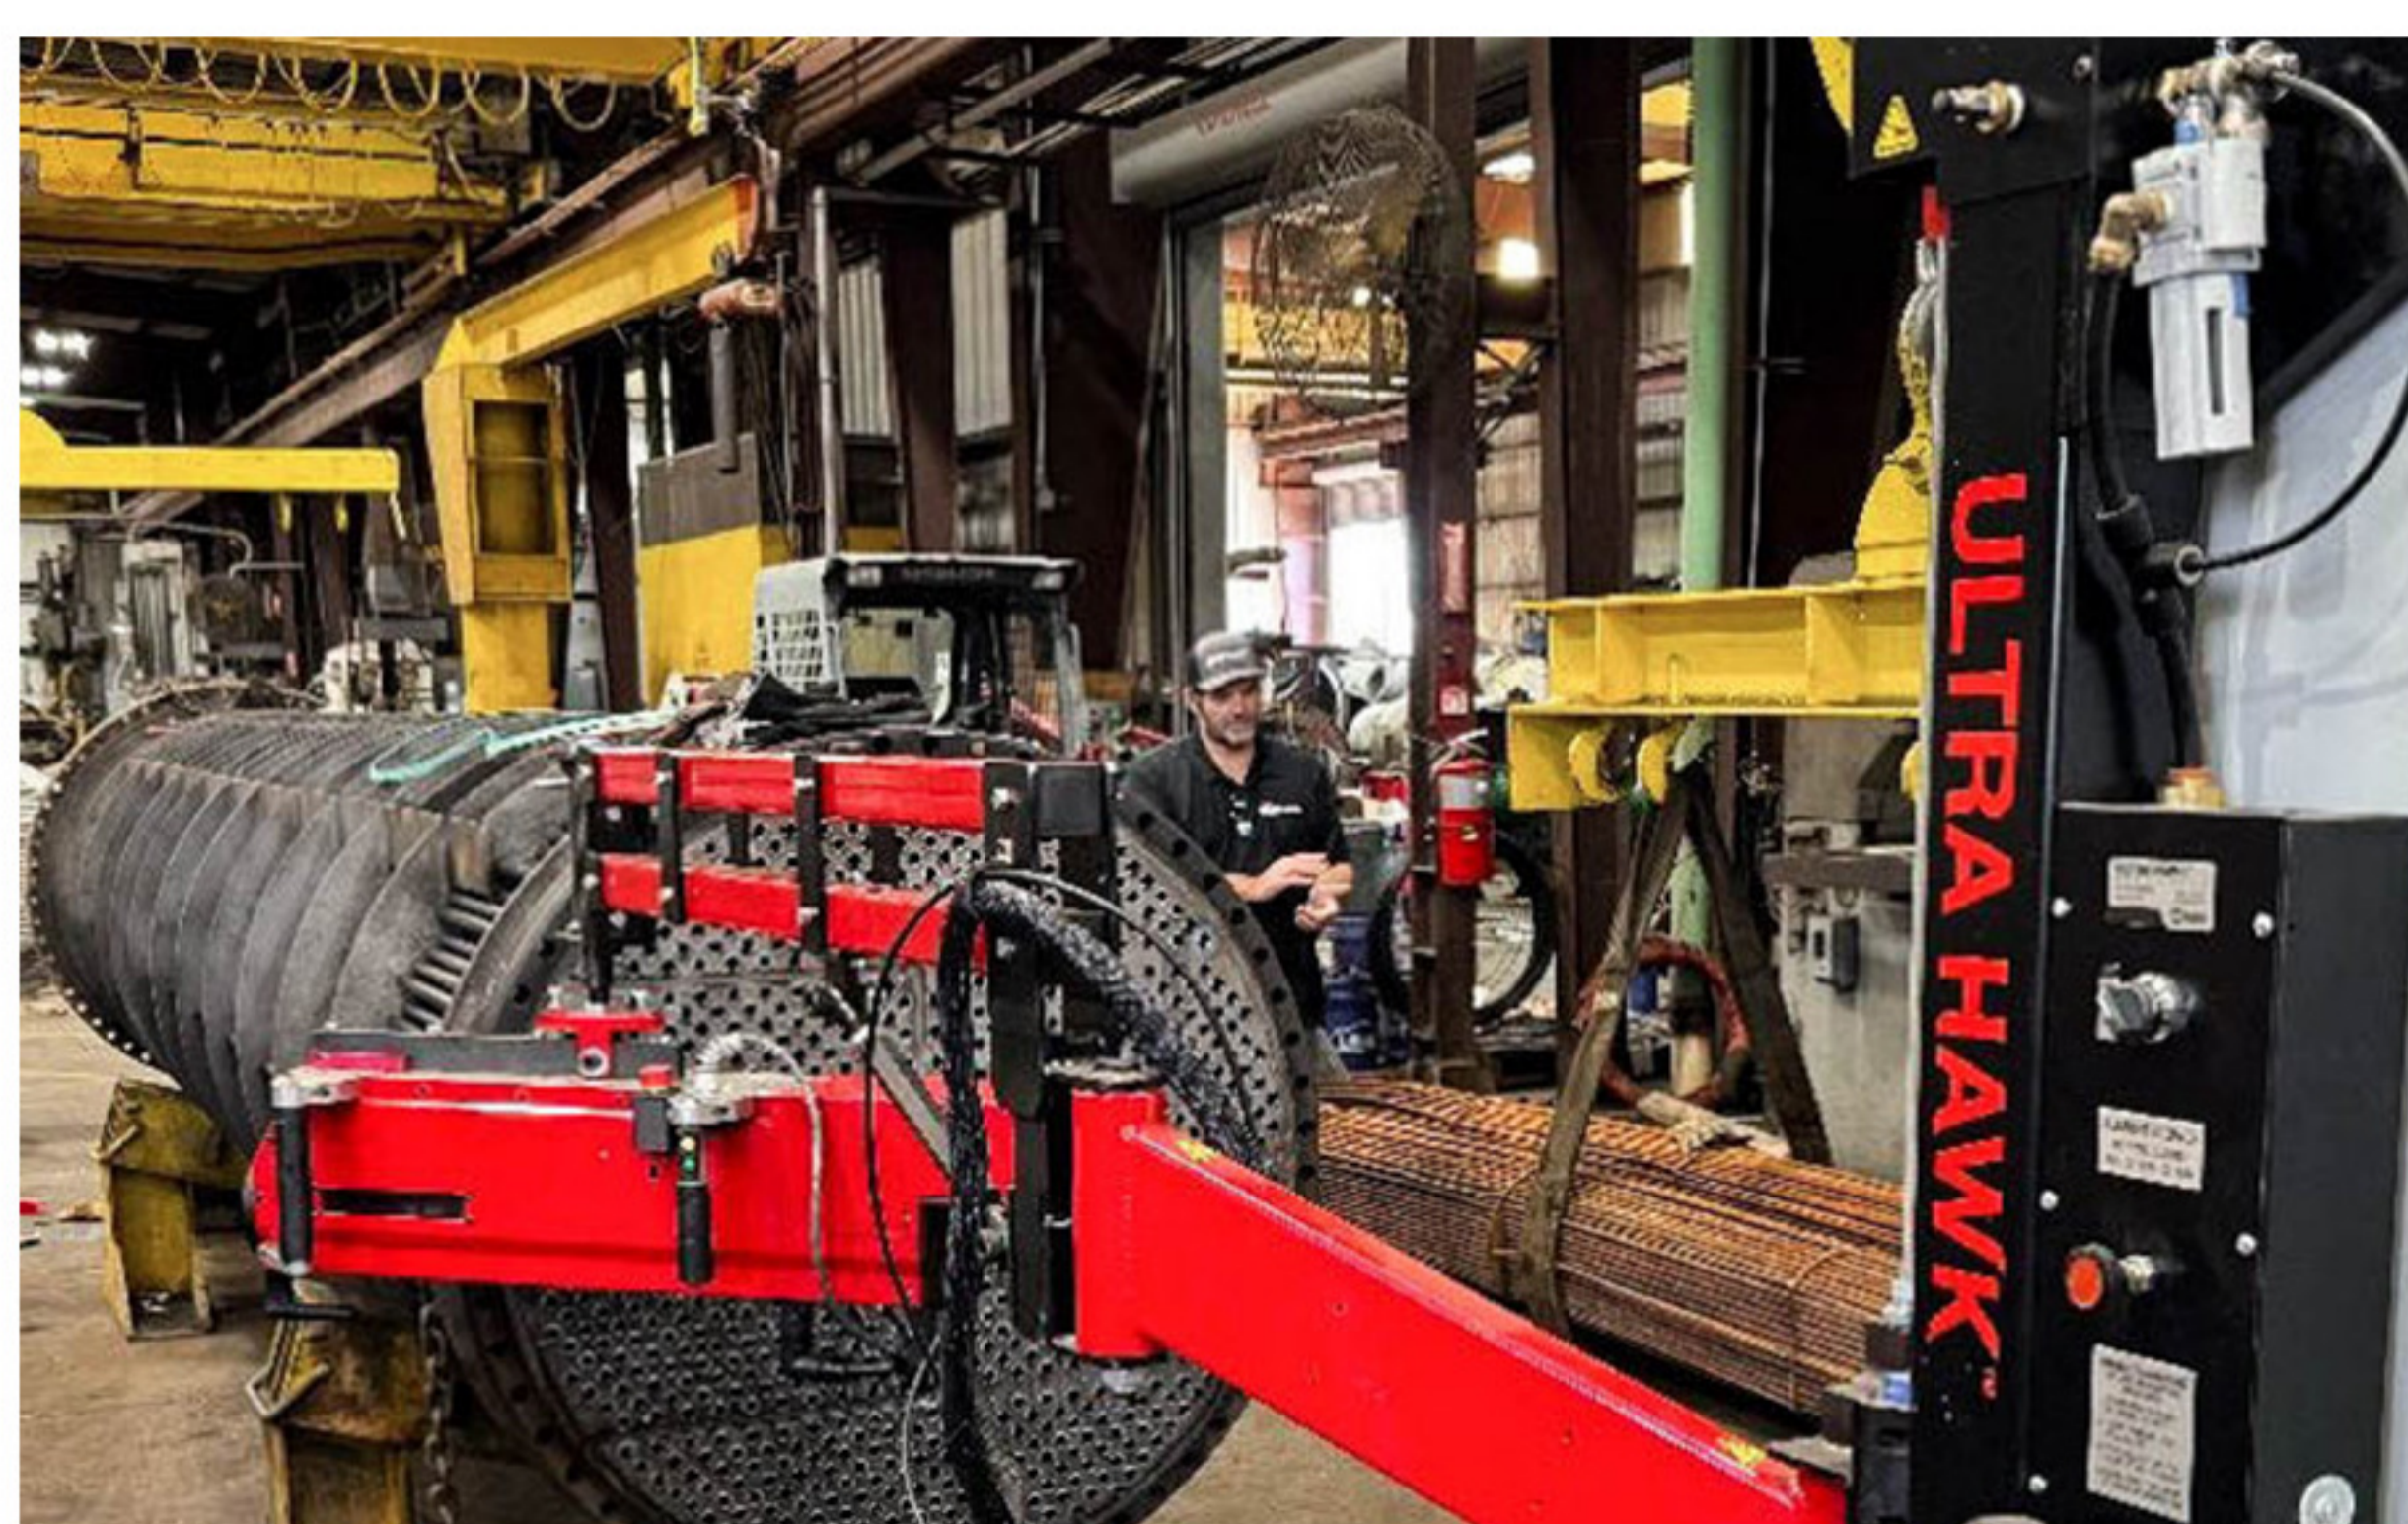

Quality tube tools for an "I need it yesterday" world.

As the original tube tool company since 1892, you can count on Elliott for high-quality products that are available when you need them.

" In the competitive environment we are in, Metalforms is always looking for ways to reduce our costs, improve our quality, and improve our safety. It is good when we can find a supplier that can do one of those really well. We are impressed when a supplier can do two of those. Elliott Tool was instrumental in helping us with all three! "

**-Dave Hearn, President
Metalforms, Ltd.**

Elliott knows how critical it is for you to have access to the right tube and pipe cleaning tools when you need them. Elliott has thousands of cleaning tools, many of which are stocked and ready to be shipped the same day. Inventory is constantly being reviewed and improved to ensure that we are stocking the items to meet your needs.

Elliott's quality and availability is backed by world-class service and support. Our employees have a combined 600 years of tube tool experience. Customers are locally supported in more than 30 countries by Elliott partners who are provided extensive product training twice each year.
